ABOUT ME

Product Developer and Technology Leader with more than 25 years of experience building software, digital products, enterprise systems, and technology infrastructure across multiple industries. My career has evolved from programming and design to technology leadership, product development, and AI-powered solutions. Working across different countries, cultures, and industries has strengthened my ability to adapt quickly, understand new environments, and transform challenges into practical solutions. I believe technology creates value only when it solves real problems.

WORK EXPERIENCE

2003–2008	ARNLINE Web Development & Digital Services

BUILD SUSTAINABLE PRODUCTS

CONTINUOUS LEARNING

TECHNOLOGY WITH PURPOSE

A LETTER OF INTRODUCTION

Dear Hiring Manager,

My career has never followed a traditional path. Over the past twenty-five years, I have worked across software development, manufacturing, enterprise systems, media, digital publishing, product design, and artificial intelligence. Rather than specializing in a single technology, I focused on understanding how technology creates value for people and organizations.

Working in different countries and industries taught me to adapt quickly, understand unfamiliar environments, and solve practical business problems. Whether developing an ERP platform inside a manufacturing factory, leading technology operations for international media organizations, or building AI-powered WordPress products, my goal has always remained the same:

Create technology that solves real problems.

Today I continue building products under ARN Smart while developing my own manufacturing business through Citroenim.com. I enjoy taking ideas from concept to production, combining software, infrastructure, product development, and user experience into practical solutions.

I'm always open to meaningful opportunities and would be pleased to discuss how my experience can contribute to your organization.

Thank you for your time and consideration.

Sincerely,

Abdulrahman Nahhas
